THIS IS UNEVALUATED INFORMATION

The following tables reflect planned and actual tank car movements of liquid fuels from the major East German liquid fuel plants during the months April, May, and June 1953. Plan figures represent the number of cars ordered; actual figures are those loaded at the plant. The figures relate only to tank car shipments for East German internal use. Shipments for SAG plants, for the Soviet Army in Germany, and for reparations and export deliveries are not included. The figures were allegedly relayed from the Reichsbahn Kesselwagenleitstelle to DHZ Kraftstoffe und Mineralöle. For computing purposes 16 metric tons was considered the average capacity of one tank car.
